I'm a Product Manager with a strong focus on digital product design. I work at the intersection of clients, IT, and design teams—transforming client needs into clear product requirements, crafting user flows, recommending design solutions, assigning tasks, and ensuring projects are delivered on time and with impact. I'm deeply passionate about building products that not only solve problems but also enhance user experiences, while continuously expanding my knowledge along the way. My life is guided by three pillars: family as my foundation, faith as my compass, and success as the result of dedication, growth, and perseverance.
